PROJECTS

Selected projects; more projects and screenshots available at derekbeck.dev

Self-Posted Workspace – Angular, TypeScript, Spring Boot, PostgreSQL

- Independently developed a full-stack web application for creating, organizing, and searching personal posts with text and attachments
- Built an Angular frontend with a Spring Boot REST API backed by PostgreSQL
- Implemented post management features, including search and filtering, timestamps, text editing, and attachment downloading

Listing Inspector Chrome Extension – Python, Flask, JavaScript, Gemini API

- Developed a Chrome extension to extract structured listing data from e-commerce pages
- Built a Flask backend integrating the Gemini API for AI image and content analysis
- Debugged frontend-to-backend communication and validated API responses

EXPERIENCE

Service Desk Analyst II – HCTec, Winston-Salem, NC August 2025 – Present

- Troubleshoot complex application, access, device, and connectivity issues for users in remote healthcare environments, escalating incidents when appropriate
- Document incidents, troubleshooting steps, and resolutions in incident tracking systems while meeting service and security requirements
- Support healthcare and enterprise applications and systems such as Epic, Cerner, Active Directory, Azure, CyberArk, VMware, Microsoft 365, and Imprivata
- Apply Windows command-line and networking troubleshooting techniques, including ipconfig, DNS cache flushing, and domain account queries
